Preface	1
---------------	---

APPLICATIONS AND INDUSTRIALISATION

<i>New aspects of getting aluminium-foam sandwich (AFS) parts into volume production</i>	5
H.-W. Seeliger	
<i>Energy absorbing behaviour of aluminium foams: head impact tests on an A-pillar of a passenger car</i>	17
R. Kretz, B. Götzinger	
<i>Application of aluminium foam for automotive brake pistons</i>	25
D. Lehmus, M. Weber, K.-H. Wollenweber	
<i>A new front buffer for suburban railcars</i>	31
K.-E. Geyer	
<i>Properties and applications of aluminium foams: two case studies</i>	37
T.D. Claar, C.-J. Yu, J.D. Adkins, H.H. Eifert	
<i>Metal foam applied to machine tools</i>	43
R. Neugebauer, T. Hipke	
<i>Scale-up issues related to producing Cymat stabilized aluminum foam</i>	49
A.-M. Harte, S. Nichol	
<i>Tailored blanking with aluminium foam sandwiches.....</i>	55
T. Schöberl, A. Otto	

PHYSICS OF METAL FOAMING

<i>Foam physics</i>	63
D. Weaire	
<i>Study of liquid-gas interactions during the foaming of compacted Al-Ti₂ powders</i>	69
R.L. Centeno Sanchez, A.R. Kennedy, J.V. Wood	
<i>Foamability of the Al-Si system</i>	77
B. Kriszt, P. Cekan, K. Faure	
<i>Study of lead foams under microgravity</i>	83
T. Wübben, S. Odenbach, J. Banhart	

<i>Effect of ambient atmosphere on metal foam expansion</i>	89
F. Simancík, K. Behulová, L. Borš	
<i>Modelling of metal foaming by in-situ gas formation</i>	93
C. Körner, M. Thies, M. Arnold, R.F. Singer	
<i>Modelling metallic foam formation</i>	99
S.J. Cox, G. Bradley, D. Weaire	
<i>Drainage of metallic foams: modelling and experimental observations</i>	105
V. Gergely, D.C. Curran, T.W. Clyne	
<i>Investigation of metal foam formation by ultra-small angle neutron scattering</i>	111
J. Banhart, D. Bellmann, H. Clemens	
<i>A generalised stability diagram of production of metallic foams by the melt route</i>	117
G. Kaptay	
<i>Changes of porosity of foamed aluminium during solidification</i>	123
Z. Wu, D.P. He	
<i>Modelling of solidification of metal foams</i>	129
V.V. Sobolev	

PROCESSING TECHNOLOGIES FOR CELLULAR METALS

<i>Cellular metals manufacturing: an overview of stochastic and periodic concepts</i>	137
H.N.G. Wadley	

Foaming of powder compacts

<i>Encasing of aluminium foams by die casting: foam core properties and core fixing</i>	147
F. Heinrich, C. Körner, M. Blenk, R.F. Singer	

<i>Comparison of foaming sandwich materials in a continuous belt furnace and a batch furnace</i>	155
J. Baumeister	

<i>Continuous metal foam production within an adapted foaming equipment</i>	161
A. Schöne, N. Büngener, J. Baumeister, M. Weber, O. Belkessam, U. Fritsching	

Foaming of melts

<i>Production of a closed-cell aluminium alloy foam with enhancement of the compressive strength</i>	167
T. Miyoshi, T. Kasai, T. Mukai, K. Higashi	

Development of a new processing technique for near net-shape foam parts based on the melt route..... 171
D. Leidlmeier, H. Flankl

Casting process for foamed magnesium 175
F.-W. Bach, H. Haferkamp, M. Niemeyer, D. Bormann

Fabrication of lotus-structured porous iron by unidirectional solidification under nitrogen gas 181
S.K. Hyun, H. Nakajima

Casting of cellular structures

Simulation of the infiltration process of molten aluminium into porous medium by a model system 187
D.P. He, D. Wen, Y. Zhang, G. Shu

Properties of investment cast cellular metal materials (CMMs) 193
C. Hintz, I. Wagner, M. Fehlbier, O. Klaassen, P.R. Sahn

Production and infiltration of metallic open cell structures with different pore sizes..... 197
M. Grohn, D. Voss, C. Hintz, P.R. Sahn

Sintering and other methods

Titanium and steel sponges prepared by powder metallurgy 203
G. Rausch, T. Hartwig

Production of slip reaction foam (SRF) and influence of production parameters on the mechanical properties 209
U. Mohr, P.-F. Scholz, W. Bleck

Scaling-up of powder metallurgical production of highly porous metals to industrial quantities
215
M. Bram, H.P. Buchkremer, A. Laptev, D. Stöver

Processing of intermetallic foam by combustion reaction 221
M. Kobashi, N. Kanetake

Quantification of NaCl in Al foams manufactured by sintering and dissolution process 227
D.X. Sun, T. Fung, Y.Y. Zhao

CHARACTERISATION AND PROPERTIES

Characterisation of structures

- Microstructure of foamable precursor and foamed aluminium material* 233
U. Mosler, A. Müller, H. Baum, U. Martin, H. Oettel
- Viewing the early stage of metal foam formation by high-resolution computed tomography* 239
L. Helfen, T. Baumbach, H. Stanzick, J. Banhart, A. Elmoutaouakkil, P. Cloetens, K. Schladitz
- 2D and 3D characterisation of metal foams using x-ray tomography* 245
A. Elmoutaouakkil, L. Salvo, E. Maire, G. Peix
- 3D investigation of strength tested metallic foams by micro-tomography* 251
E. Jasiuniene, J. Goebbels, B. Illerhaus, P. Löwe, A. Kottar
- Sound transmission study on liquid foams* 255
U. Laun, J. Banhart

Structure and properties

- Influence of microstructural dispersions on the effective properties of cellular solids* 259
A. Fazekas, R. Dendievel, L. Salvo, Y. Bréchet
- Modelling of mechanical properties of inhomogeneous cellular materials* 265
B. Foroughi, B. Kriszt, H.P. Degischer
- On the mechanical and microstructural characterisation of aluminium foams* 269
A.-H. Benouali, L. Froyen
- Relationship between structure and mechanical properties of aluminium foam* 273
E. Koza, M. Leonowicz
- Properties of cellular aluminium produced by a new melt route foaming technique* 277
D. Leitmeier, H. Flankl
- Acoustic emission in aluminium foams under compressive load* 283
F. Baumgärtner, H. Kruschek, H.-J. Schwalbe, K. Nijhof

Fracture, fatigue and damping

- Experimental methods for the determination of fracture toughness values for ductile metallic foams* 289
C. Motz, R. Pippan

<i>Size effects in the fracture of metallic foams</i>	293
N.A. Fleck, C. Chen, M.F. Ashby	
<i>Deformation and fracture behaviour of ductile aluminium foams in the presence of notches under tensile loading</i>	299
C. Motz, R. Pippan, A. Ableidinger, H. Böhm, F.G. Rammerstorfer	
<i>Fatigue behaviour of an aluminium foam sandwich beam under alternating bending</i>	305
T. Beck, D. Löhe, F. Baumgärtner	
<i>Fatigue behaviour of open- and closed-cell Al-foams</i>	311
A. Ohrndorf, U. Krupp, H.-J. Christ	
<i>Experimental studies and simulations of the fatigue behaviour of metal foams</i>	317
H. Harders, J. Rösler, K. Hupfer, E. Steck	
<i>Mechanical damping of some Al foams under cyclic deformation</i>	323
I.S. Golovin, H.-R. Sinning, J. Göken, W. Riehemann	
Crash behaviour, dynamic loading and energy absorption	
<i>Crash behaviour of foam-based components: validation of numerical simulations</i>	329
A.G. Hanssen, M. Langseth, O.S. Hopperstad	
<i>Impact testing of metallic honeycombs and foams</i>	339
H. Zhao	
<i>Influence of cell size and morphology on the dynamic compressive strength of aluminium alloy foams</i>	345
P.J. Tan, J.J. Harrigan, S.R. Reid	
<i>Compressive properties and energy absorption of foamed Al alloy</i>	351
B. Wang, D.P. He, G. Shu	
Composite structures	
<i>Use of zinc foam for filling of hollow steel profiles</i>	355
J. Kováčik, F. Simancík	
<i>An investigation in aluminium foam crushing behaviour for energy absorber design</i>	359
G.B. Broggiato, F. Campana, F. Mascioni, G. Santucci	
<i>Reinforced aluminium foams</i>	365
F. Simancík, L' Lúcan, J. Jerz	
<i>Numerical predictions of the creep response of sandwich beams with a metallic foam core</i>	369
C. Chen, N.A. Fleck, M.F. Ashby	

Alternative topologies and materials

<i>Topology optimisation with metallic foams</i>	375
A. Burblies	
<i>Cellular metal truss core sandwich structures</i>	381
D.J. Sypeck, H.N.G. Wadley	
<i>The structural performance of near-optimized truss core panels</i>	387
S. Chiras, A.G. Evans	
<i>Manufacture and properties of hollow sphere structures in sound absorption applications</i>	391
H. Göhler, P. Löhman, U. Waag, H. Schneidereit, E. Bernhard	
<i>Modelling and simulation of the meso- and macro-mechanical properties of hollow sphere structures</i>	397
J. Gründer, G. Landgraf, O. Andersen, P. Löhman	
<i>Deformation and fracture analysis of stainless steel and titanium foams</i>	403
M. Koçak, M. Horstmann, V. Venske, M. Bram, H.P. Buchkremer, A. Laptev	
<i>Mechanical damping of porous stainless steel</i>	409
N.V. Kirillova, I.K. Arhipov, S.A. Golovin, I.S. Golovin, H.-R. Sinning, M. Bram	
<i>Characterisation of porous nickel-titanium alloys for medical applications</i>	415
R. Hernández, S. Polizu, S. Turenne, L.H. Yahia	
<i>Mechanical properties of lotus-structured porous copper fabricated by unidirectional solidification</i>	421
S.K. Hyun, K. Murakami, H. Nakajima	
<i>Evaluation of porosity in lotus-type porous copper solidified in gas atmosphere</i>	425
S. Yamamura, K. Murakami, H. Shiota, H. Nakajima	
Other topics	
<i>Electrical conductivity of metallic foams</i>	429
J. Kovacík, Š. Barta, J. Bielek	
<i>On plasticity and deformation induced anisotropy in metallic foams</i>	433
I. Schmidt	
<i>Cosserat modelling of an elasto-viscoplastic rectangular lattice</i>	439
P.R. Onck	
<i>Non-contacting locally resolved strain measurement of aluminium foams</i>	445
S. Rohde, M. Münch, M. Schlimmer	

<i>Redefining the concept of stress-strain curve for foams</i>	449
T. Wierzbicki, M. Doyoyo, A. Markaki	

<i>Development and application of material models for the description of deformation behaviour of aluminium foams</i>	455
F. Andrieux, S. Sommer, D.-Z. Sun	

SECONDARY OPERATIONS

Coating

<i>Coatings and surface treatments for aluminium foam components</i>	461
T. Schambron, R. Gramlinger, R. Kretz	

<i>Surface refinement of metal foams</i>	467
M. Maurer, E. Lugscheider	

Joining

<i>Joining technologies for Al foams - Al sheet joints</i>	473
T. Bernard, H.W. Bergmann, C. Haberling, H.G. Haldenwanger	

<i>Potential of laser welding of metal foams</i>	479
H. Haferkamp, A. Ostendorf, M. Goede, J. Bunte	

<i>Ultrasonic spot welding of aluminium foams to sheet metal</i>	485
C. Born, H. Kuckert, G. Wagner, D. Eifler	

<i>Joining of cellular metal parts using foamable filler metal</i>	489
F.W. Bach, H. Balzer, V. Kruzhanov, V. Zeitz	

<i>Laser beam and inert gas-shielded arc welding of foamable aluminium</i>	495
T. Böllinghaus, W. Bleck	

<i>Brazing of aluminium foam with cellular filler metals</i>	501
K.-J. Matthes, H. Lang	

Forming

<i>High-temperature forming of cellular aluminium</i>	505
M.C. Hahn, A. Otto
